

DUST BARRIER SYSTEM

RELY ON CURTAIN-WALL!

1. Flame retardant sheeting

- Certified NFPA-701 / EN 13501-1
- Translucent
- Non-transparent for maximum privacy
- Strong PE foil
- Dust-proof mounting with special clips

2. Integrated suspension

- The springy telescopic pole generates a constant pressure between floor and ceiling

3. Lock system

- Press, let go, done!
- Maintenance free

4. Header

- Forms the connection between the dust wall and the ceiling
- No point load due to optimum pressure distribution, therefore particularly suitable for suspended ceilings

5. Ringtop

- The ringtop presses the header against the ceiling, distributing the pressure over the entire length of the header

6. Header and side foam

- Perfect sealing against ceiling and wall
- Prevents damage

7. Curtain-Door (120cm wide)

- Module with sealable passageway
- Applicable in any setup

8. Zip-Up Set

- Set of 2 self-adhesive zippers
- Easily creates a passageway everywhere

9. Multi clamp and clips

- The clips fix the foil to the telescopic pole
- The multi clamp holds the rolled-up foil up

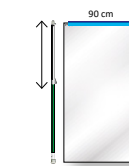

10. Duffel bag and accessories

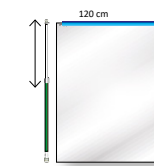

- Easy storage and transport
- Always ready for the next job

EXTENSIONS

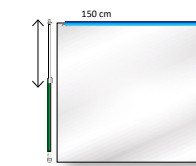

Curtain-Wall is a modular system; all modules are interconnectable. Various extensions are available and any replacement parts can be reordered. So you determine the composition of your dust wall yourself per project.

WALL SURVIVAL PACK

System features

Curtain-Wall has countless variations and can be made suitable for any room.

Width
Modules of 90cm, 120cm and 150cm. Infinitely connectable.

Height
Standard up to 400cm. With extensions you can reach a height up to 500cm.

Ceilings and walls
Dust-tight connection on walls and ceilings. Thanks to its sophisticated pressure distribution, it is also suitable for suspended ceilings.

Floor connection
Dustproof floor connection through a special roll-up strip.

Foil
The Curtain-Wall system is standard fitted with sturdy fire-retardant PE foil. Certified NFPA-701 / EN 13501-1

Passageway
Use the ready-made Curtain-Door door module or the self-adhesive Zip-Up zip passages.

- STOP NUISANCE FROM DUST, DIRT AND DRAFTS
- GUARANTEED PROFITABLE
- FULLY FLEXIBLE IN SHAPE AND SIZE
- SAFE AND FIRE RETARDANT COMPLIES WITH EN 13501-1
- QUICK SET UP
- REUSABLE TIME AFTER TIME
- PROFESSIONAL IMAGE

for public buildings

FLEXIBLE MODULAR DUST BARRIER SYSTEM

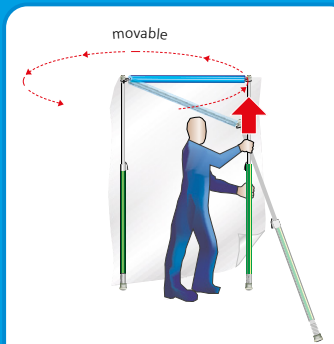

Curtain-Wall is a fast solid dust barrier system. It stops dust, dirt and draughts during remodelling, renovations and maintenance.

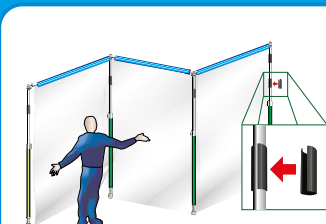

By installing a Curtain-Wall dust barrier system, you can divide the space. While the construction activities are being carried out, daily life in the adjoining rooms can therefore continue without the nuisance of (fine) dust, dirt and draughts.

Ideal for renovating homes, offices, hotels, public buildings, museums, shops and hospitals.

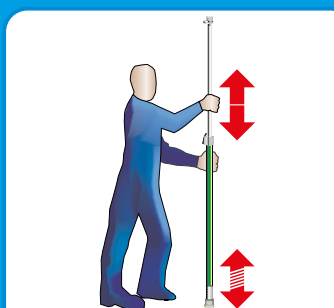

Curtain-Wall is easy to take along and very easy to set up. Curtain-Wall can be used for both large projects and smaller jobs. It can be used time after time. Standard equipped with fire-retardant sheeting.

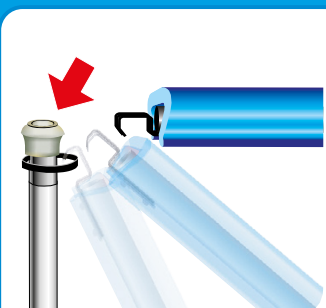

Connectable and movable

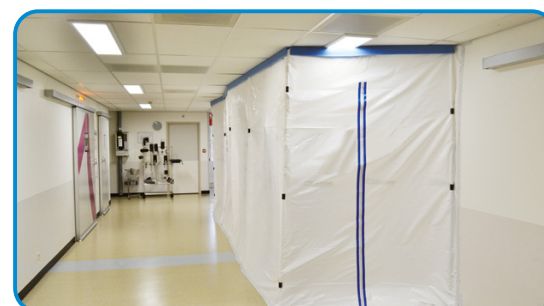

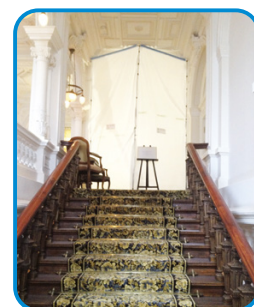

Add multiple modules for a dust wall in any desired size and shape

Effortless set-up, thanks to the springy telescopic pole

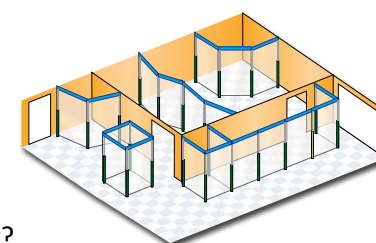

Fast and solid assembly

DISCOVER ALL INSTALLATION OPTIONS

Large offices? Smaller living rooms? Want to quickly screen off a doorway? With Curtain-Wall you can easily create any desired arrangement and shape.
